

RELIABLE PRODUCER OF TASTY FROZEN PRODUCTS

Chef
Lundén

MANY YEARS OF EXPERIENCE IN HANDCRAFTED FROZEN HEAT&EAT PRODUCTION

Lunden Food's factory is located in Loo, Jöelähtme Parish, where we focus primarily on producing fresh sandwiches with a variety of fillings. We are part of the Oy Lundén Ab group. Creativity, reliability, and flexibility are at the heart of everything we do. In addition to sandwiches, we also produce a wide range of products daily, including salads, ready meals, pizzas, cabbage rolls, slow-cooked meats, sandwich spreads, and much more.

Our product range includes products we have been producing since the first years, but each year we introduce many new products, featuring both - traditional and world cuisine inspired flavors. Our goal is to offer consumers delicious food made with the best ingredients possible.

CREATIVITY,
RELIABILITY, AND
FLEXIBILITY ARE
AT THE HEART
OF EVERYTHING
WE DO.

We are proud to be certified with the FSSC 22000 food safety standard and the ISO 14000 environmental management standard. In 2017 we launched the Chef Lundén brand in Finland. In 2020 the Chef Lundén brand was launched in Estonia.

As our production capacity has grown year by year, we continue to modernize and expand our factory. After the completion of the expansion in 2026, our production space will be total of 10000 m².

Lunden Food has been recognized three times as the best food industry company in Estonia.

Lunden Food's mission is to provide consumers with enjoyment and culinary experiences through food made from high-quality ingredients.

Lunden Food's vision is to be the most valued and innovative profitable food industry in Estonia, offering consumers delicious and high-quality food.

Freshly frozen

Freezing technology helps us bring our amazing sandwich ideas and flavors to more distant markets. The products are developed in such a way that after thawing, no one

would believe they were ever frozen. This is a skill, and we take pride in having the expertise to pleasantly surprise our customers and consumers.

Frozen sandwiches are an ideal solution for convenience food sector or retail customers to offer their clients tasty products without worrying about wastage and daily orders. The sandwiches stay fresh at -18°C for up to a year—just plan your stock and operate with peace of mind.

Private label

For over 15 years, we have been manufacturing private label products for various retail chains and the convenience food sector in Estonia, Finland, Latvia, and Lithuania, as well as for the HoReCa sector in Sweden. Some examples are SOK, Kesko, Circle K, Tallink etc.

THE SECRET BEHIND THE FRESHNESS OF OUR PRODUCTS

I can't believe it! They were frozen?! These are regular comments we have heard. It is time to start to believe in frozen sandwiches and their tastiness. Because we do! And we make them so good, that your tastebuds are going to dance, if you try one... or maybe the tastebuds are not the only ones who are dancing?

Our sandwiches are freshly made from the best ingredients and handcrafted with care. After preparing the best sandwiches, they are going to be frozen. As a next step, we have a chance to share the flavours around the world. You, on the other hand, have the chance to cook them in the

oven for that extra crispiness and tastiness. Who doesn't like the combination of melted cheese and great smell from the oven?

On the other hand, if you do not have the feeling of grilling or heating up our sandwiches, then we also offer the range of ready to eat sandwiches. These products are meant to be eaten after thawing. Convenient, aye?!

So...have a taste, let your tastebuds go wild and enjoy the ride with us! Hmm... what else!? Oh, the packaging part! Our products are available in different packaging options.

DEFROSTING INSTRUCTIONS FOR READY TO EAT AND READY TO HEAT SANDWICHES:

Defrost in the refrigerator overnight or at room temperature for 3 hours.
After defrosting, store at a temperature of up to 6°C and consume within 5 days.

ALLERGENS

Allergies and people are big issue in nowadays world. We have to keep everybody safe, and also give them the security, that they will be fine after eating a specific sandwich. To make it easier for you, we have created the system, which allows you to see the allergens of each product. We have marked the allergene to each product, which might occur in the product.
